^a The poverty gap ratio at \$1.25 a day (2005 PPP) measures the magnitude of poverty.

Expressed as a percentage of the poverty line, it is the result of multiplying the proportion of people who live below the poverty line by the difference between the poverty line and the average income of the population living under the poverty line.

^b High-income economies, as defined by the World Bank, are excluded.

^c Estimates by the World Bank, May 4, 2015.

^a The prevalence of underweight children is estimated according to World Health Organization (WHO) child growth standards. The United Nations Children's Fund and WHO have initiated a process to harmonize anthropometric data used for the computation and estimation of regional and global averages and trend analysis.

^b Owing to differences in source data and estimation methodology, these prevalence estimates are not comparable to the averages published in previous editions of the present report.

^c Data were calculated on the basis of the most recent surveys carried out during the period specified.

^a Since there are no regional averages for the official indicator, the table displays the gross intake ratio to the last grade of primary, which corresponds to the “total number of new entrants in the last grade of primary education, regardless of age, expressed as a percentage of the population of the theoretical entrance age to the last grade” (United Nations Educational, Scientific and Cultural Organization (UNESCO), Institute for Statistics, *Global Education Digest 2009: Comparing Education Statistics Across the World*, annex B.

^b The primary completion rates correspond to school years ending in the years displayed.

^c Values refer to 1992.

^a "HIV prevalence among population aged 15 to 24 years" was chosen as a proxy indicator for the incidence rate when the indicators for the United Nations Millennium Declaration were developed. However, the estimated incidence rate among people aged 15 to 49 years is now available for all regions and from 60 countries. The HIV incidence rate is therefore presented here together with HIV prevalence data among people aged 15 to 49 years.

^b Lower and upper bounds in parentheses.

^c Based on the subregional classification adopted by the Economic Commission for Africa.

^d Trend data for the indicator 6.1 are available from only 35 countries, almost all in sub-Saharan Africa, and are therefore not presented here.

^a Percentage of women and men aged 15 to 24 years who correctly identify the two major ways of preventing the sexual transmission of HIV (using condoms and limiting sex to one faithful, uninfected partner), reject two common local misconceptions and know that a healthy-looking person can transmit HIV.

^b Data were calculated on the basis of the most recent surveys carried out during the period specified.

^a Ratio of the current school attendance rate of children aged 10 to 14 years whose two biological parents have died to that of children aged 10 to 14 years whose two parents are still alive and who currently live with at least one biological parent.

^b Data were calculated on the basis of the most recent surveys carried out during the period

specified.

^d National reporting to the United Nations Framework Convention on Climate Change that follows the Intergovernmental Panel on Climate Change guidelines is based on national emission inventories and covers all sources of anthropogenic carbon dioxide emissions. It can be calculated as the sum of emissions for the sectors of energy, industrial processes, agriculture and waste.

^a For years prior to the entry into force of the reporting requirement for a group of substances, missing country consumption values have been estimated at the base-year level. This applies to substances in annexes B, C and E to the Montreal Protocol on Substances that Deplete the Ozone Layer, which entered into force in 1992, 1992 and 1994, respectively.

Goal 8 Develop a global partnership for development

Target 8.A Develop further an open, rule-based, predictable, non-discriminatory trading and financial system

Includes a commitment to good governance, development and poverty reduction — both nationally and internationally.

Target 8.B Address the special needs of the least developed countries

Includes: tariff- and quota-free access for least developed countries' exports; enhanced programme of debt relief for heavily indebted poor countries and cancellation of official bilateral debt; and more generous official development assistance (ODA) for countries committed to poverty reduction.

Target 8.C Address the special needs of landlocked developing countries and small island developing States (through the Programme of Action for the Sustainable Development of Small Island Developing States and the outcome of the twenty-second special session of the General Assembly)

Target 8.D Deal comprehensively with the debt problems of developing countries through national and international measures in order to make debt sustainable in the long term

Sources: Inter-agency and Expert Group on Millennium Development Goal Indicators and Millennium Development Goal Indicators website (<http://mdgs.un.org>).

Notes: Except where indicated, regional groupings are based on United Nations geographical regions, with some modifications necessary to create, to the extent possible, homogeneous groups of countries for analysis and presentation. The regional composition adopted for the 2014 reporting on Millennium Development Goal indicators is available at <http://mdgs.un.org>, under “Data / Regional groupings”.

Where shown, the expression “developed regions” comprises Europe (except the Commonwealth of Independent States), Australia, Canada, Japan, New Zealand and the United States. The expression always includes transition countries in Europe.

For some Millennium Development Goal indicators, data are presented separately for smaller subregions in Africa, based on the classification adopted by the Economic Commission for Africa.
